TC-11

Security and Privacy Protection in Information Processing Systems

Factsheet

WG 11.4

Network & Distributed Systems Security

Version: 25 August 2018

Introduction

(Strategic issues / questions: Introduction and mission statement)

Working group 11.4 was established in 1985 as working group on Crypto Management, revised in 1992 and 1997 and renamed into working group on Network & Distributed Systems Security in 2003.

Statement of case (last revised: 08-2018)

Management in any organization is responsible for the reliable and secure operation of the information systems that support the organization. As inter and intra-organization networking between information systems become the rule as well as the daily operational environment, the scope of concern takes on new aspects and new technical details come into play. Management must not only address the security issues of wholly internal systems together with any networks to which they might be connected, but also must assure that the protective mechanisms installed in them are not accidentally or intentionally thwarted or subverted by other systems with which data exchange connections are established.

The range of subjects includes local area networks, regional and wide area networks, homogeneous and heterogeneous networks, and the networks which can arise for varying periods of time as a result of operational requirements for temporary or semi-permanent interconnections which can exist for varying periods of time.

Such networks will include dial-up or other connections which permit an organization's employees to work from their homes, and those external connections enabling organizations to transact mutually linked business activities e.g. such as will take place under Electronic Data Interchange (EDI) agreements.

Aims and scope (last revised / reconfirmed 08-2018)

(Strategic issues / questions: What does the TC address, what does it want to achieve, what are the groups of people the working group focuses on, what are the boundaries of the work area)

- To study and promote internationally accepted processes which will enable management and technicians to fully understand their responsibility in respect of the reliable and secure operation of the information networks which support their organizations, their customers or the general public.
- To study and promote education and training in the application of security principles, methods, and technologies to networking.

The scope of the working group is:

- To promote the awareness and understanding of the network aspect of information systems security.
- To provide a forum for the discussion, understanding and illumination of network security matters.
- To study and identify the managerial, procedural and technical aspects of network security; and hence to define the network security issues.
- To study and describe the risks that arise from embedding an information system in a network environment.
- To advance technologies and practices that support network security controls, make possible the statement of requirements for network security, and in general, advance the foundation for effective network security.
- To contribute, as feasible and appropriate, to international standards for network security.

Products, services and activities (last revised / reconfirmed 08-2018)

(Strategic issues / questions: What are the products and activities the working group will deliver)

Work shop:

The working group organised the international workshop iNetSec “Open Research Problems in Network Security” in the last years. The objective is to present and discuss open problems and new research directions on all aspects related to network security. The research works presented at the workshop are published in Springer LNCS.

Membership rules (last revised / reconfirmed mm-yyyy)

(Strategic issues / questions: Membership rules)

Contact details

Contact of working group chair:

Prof. Dr. Dogan Kesdogan
Department of Business Information Systems 4
University of Regensburg
DE-93040 REGENSBURG
Germany

Telephone: +49 941 943 5901

Fax: +49 941 943 5902

E-mail: kesdogan@ur.de

Annex a. Membership

- **Officers, current**

Chair: Dogan Kesdogan, University of Regensburg, Germany

Vice-chair: Jan Camenisch, IBM Research Zurich, Switzerland

Secretary: Vinh Pham, Siemens AG, Germany

- **Membership list**

DE: Kai Rannenber

GB: Siraj Ahmed Shaikh

US: Matthew Bishop

- **Officers, history**

Chair:	Bart de Decker	May 2000 – May 2006
	Refik Molva	May 2006 – May 2009
	Jan Camenisch	May 2009 – May 2015
	Dogan Kesdogan	since May 2015

Vice-chair	Dogan Kesdogan	May 2009 – May 2015
	Jan Camenisch	since May 2015

Secretary:	Michalis Georgiou	May 2006 – May 2009
	Siraj Ahmed Shaikh	May 2009 – July 2015
	Vinh Pham	since July 2015
